

## ONS Output Area Classification

Output Areas are small areas of approximately 125 households designed specifically for the 2001 Census. These are the geographical unit used to create the Output Area Classification (OAC). Following a similar structure to the other National Statistics Area Classifications the OAC has been constructed as a three-layered hierarchy of clusters. The three layers are:

- **Supergroups:** Seven main clusters or Supergroups. Any Output Area in the UK is classified as belonging to one of these seven types of Supergroup.
- **Groups:** Each Supergroup consists of between two and four constituent Groups. There are 21 Groups across all the Supergroups.
- **Subgroups:** Although not listed in this summary document, each Group consists of between two and four Subgroups. There are 52 Subgroups in total.

This structure allows the classification to be used to analyse data in different ways. Using the classification at Supergroup level can give an overall perspective and help to analyse particularly sparse datasets. Analysis with Groups and Subgroups can provide more detail.

## Supergroup 1- Blue Collar Communities – 11.6% of the East Riding’s population

The members of this supergroup can be found all across the UK with areas of concentration around the North-East, South Wales and cities within Scotland and the Midlands. The supergroup comprises of 3 groups, 1a (3 subgroups), 1b (2 subgroups) and 1c (3 subgroups). There are 14 wards that have all their output areas classified in this supergroup including Creggan South, Creggan Central, Greystone, East, Ballycolman, Farranshane, and Whiterock in Northern Ireland, Thornley and Wheatley Hill, Edward and Prior in the North-East, Pembroke: Monkton, Gwynfi and Green Lane in Wales and Viewpark in Scotland.

Within this Supergroup: <a href="#">Terraced Blue Collar</a> , <a href="#">Younger Blue Collar</a> , <a href="#">Older Blue Collar</a>	
Variables with proportions well above the national average *	Terraced Housing
	Rent (Public)
Variables with proportions close to the national average*	Age 25-44
	Age 44-65
	Age 65+
	Agriculture/Fishing Employment
	Health and Social Work Employment
	Provide unpaid Care
Variables with proportions far below the national average *	HE Qualification
	All Flats

\*1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

***Group 1a – Terraced Blue Collar – 0.3% of the East Riding’s population***

The members of this group can be found in areas of concentration around Scotland, the North-East and the South of Wales. There is one ward, Viewpark in Scotland, that has all its output areas classified in this group. There are 6 more wards that have 75% or more including Creggan South and Farranshane in Scotland, Biddick Hall and West in the North-East, Templehall West in Scotland and Greenmeadow in Wales.

Variables with proportions well above the national average	Rent (Public)
	Terraced Housing
Variables with proportions close to the national average	Single Pensioner Householder
	Age 25-44
	Age 45-64
Variables with proportions far below the national average	Health and Social Work Employment
	No Rent (Private)
	No Central Heating
	Born Outside UK
	Detached Housing

***Group 1b – Younger Blue Collar – 4.8% of the East Riding’s population***

The members of this group can be found in areas of concentration around the boundaries of the North-West, Yorkshire and the Humber and both the East and West Midlands. There is one ward, Gwynfi in Wales, that has all its output areas classified in this group. There are 11 other wards that have 80% or more including, Bowydd and Rhiw, Kingsland, Marchog and Pembroke: Monkton in Wales, Cherryfield and Pirrie in the North-West, Orchard Park and Greenwood in Yorkshire and the Humber, Aspley in the East-Midlands, Barncroft in the South-East, Huntingdon North in the East of England and Drumglass in Northern Ireland.

Variables with proportions well above the national average	Terraced housing
	No central heating
	Lone parent household
Variables with proportions close to the national average	Students (full time)
	Single pensioner household
	Provide unpaid Care
	Age 25-44
Variables with proportions far below the national average	Detached housing
	HE qualification
	All flats

***Group 1c – Older Blue Collar – 6.4% of the East Riding’s population***

The members of this group can be found in areas of concentration around the boundaries of the North-West, Yorkshire and the Humber and both the East and West Midlands also in the North-East and South Wales. There is one ward, St. Cadocs and Penygarni in Wales, that has 80% its output areas classified in this group. There are 8 other wards that have 60% or more including, Bettws, Cwmyniscoy and Trimsaran in Wales, Clifton in the North-West, Shirebrook North-West in the East-Midlands, Cannock North in the West-Midlands, Kingsmoor in the East of England and Ballylough in Northern Ireland.

Variables with proportions well above the national average	Terraced housing
	Rent (Public)
Variables with proportions close to the national average	Age 25-44
	Population density
	Rooms per household
	Two adults no children
	Divorced

	Rent (private)
	All Flats

## Supergroup 2 – City Living – 0.6% of the East Riding’s population

The members of this group can be found in areas of concentration in the cities of England, Wales and Scotland. There are 5 wards, Bishopsgate, Farringdon Without, Queenhithe, Tower and Walbrook that have all of their output areas classified in this group with all 5 being in London.

Within this Supergroup: <a href="#">Transient Communities</a> , <a href="#">Settled in the City</a>	
Variables with proportions well above the national average	HE Qualification
	Born outside the UK
	All flats
Variables with proportions close to the national average	Single pensioner household
	People per room
	Work from home
	Unemployed
	Divorced
Variables with proportions far below the national average	Age 5-14
	Detached housing

**Group 2a – Transient Communities – 0.0% of the East Riding’s population**

The members of this group can be found around cities of England and Scotland. There is one ward, Farringdon in London, that has all its output areas classified in this group. There are 13 other wards that have 70% or more including Central, Folkestone Harvey Central, Folkestone Harvey West, Heene and St Margaret's in the South-East, Chiswick Homefields and Twickenham Riverside in London, St James and Westbourne and West Cliff in the South-West, St Nicholas in North-East, Ramshill in Yorkshire and the Humber, St Andrews Central in Scotland and Menai (Bangor) in Wales.

Variables with proportions well above the national average	Financial intermediation employment
	No central heating
	Born outside the UK
	Public transport to work
Variables with proportions close to the national average	Rent (public)
	Divorced
Variables with proportions far below the national average	Working part-time
	Lone parent household
	Age 0-4
	2+ car household

***Group 2b – Settled in the City – 0.6% of the East Riding’s population***

The members of this subgroup are found in areas of concentration around Glasgow and Edinburgh in Scotland and parts of London. There are 4 wards Bishopsgate, Queenhithe, Tower and Walbrook in London that have all of their output areas classified in this subgroup.

Variables with proportions well above the national average	All flats
	Rent (private)
	Born outside the UK
	GE qualification
Variables with proportions close to the national average	Health and social work employment
	Age 65+
	Two adults no children
Variables with proportions far below the national average	Age 5-14
	Households - non dependent children
	Detached housing

### Supergroup 3 – Countryside – 33.3% of the East Riding’s population

The members of this group can be found in areas across England, Northern Wales and areas of Scotland and Northern Ireland. There is one ward, Wharrels in the North-West, that has all of its output areas classified in this group. There are 8 other wards that have 80% or more including Llanidan, Porthmadog-Tremadog and St. Ishmael's in Wales, Walpole and Wenden Lofts in the East of England, Norhamshire in the North-East, Tove in the East-Midlands and East Downs in the South-East.

Within this Supergroup: <a href="#">Village Life</a> , <a href="#">Agricultural</a> , <a href="#">Accessible Countryside</a>	
Variables with proportions well above the national average	2+ car household
	Work from home
	Agriculture/fishing employment
Variables with proportions close to the national average	Health and social work employment
	Single pensioner household
	Working part-time
	Hotel and catering employment
	Age 5-14
Variables with proportions far below the national average	All flats
	Public transport to work
	Population density

***Group 3a – Village Life – 15.0% of the East Riding’s population***

The members of this group can be found in areas of concentration in Scotland, Northern Ireland, North-West, East and South-West of England and Mid Wales. There are 52 wards across the UK that have all their output areas classified in this group including 12 of in the West-Midlands, 8 in both the South-West and Wales, 7 in the North-West, 6 in both Northern Ireland and Scotland, 3 in the East-Midlands and 2 in the North-East.

Variables with proportions well above the national average	Agriculture/fishing employment
	Detached housing
Variables with proportions close to the national average	Terraced housing
	Health and social work employment
	Manufacturing employment
	Routine/semi-routine occupation
Variables with proportions far below the national average	Age 5-14
	Public transport to work
	Population density
	All flats

**Group 3b – Agricultural – 9.8% of the East Riding’s population**

The members of this group can be found mainly within England. There is one ward, Hambleton Valley in the South-East, that has 89% of it's output areas classified in this group. There are a further 8 wards that have 75% or more including, Bardon and Leam Valley in the West-Midlands, Abersoch in Wales, Levens in the North-West, Stannington in the North-East, Whissendine in the East-Midlands, Hartfield in the South-East and Orchard Hill in the South-West.

Variables with proportions well above the national average	Agriculture/fishing
	Detached housing
	Work from home
	2+ car household
Variables with proportions close to the national average	Hotel and catering employment
	Working part-time
Variables with proportions far below the national average	Population density
	Terraced housing
	All flats
	Public transport to work

***Group 3c – Accessible Countryside – 8.4% of the East Riding’s population***

The members of this subgroup can be found mainly within England and Northern Ireland. There is one ward, Morkery within the East-Midlands, that has 75% of its output areas classified in this subgroup. There are 11 other wards that have 60% or more including Aveland, Cote and Tove in the East-Midlands, Manea, Walpole and Wenden Lofts in the East of England, Aber-craf and Clynnog in Wales, The Vow in Northern Ireland, Lynesack in the North-East and All Cannings in the South-West.

Variables with proportions well above the national average	2+ car household
	Work from home
	Agriculture/fishing employment
Variables with proportions close to the national average	Health and social work employment
	Single pensioner household
	Working part-time
	Age 5-14
	No central heating
Variables with proportions far below the national average	Rent (public)
	Public transport to work
	Population density

## Supergroup 4 – Prospering Suburbs – 29.3% of the East Riding’s population

The members of this group can be found in areas of concentration around the outskirts of cities within the UK. There is one ward, Park Farm South in the South-East, that has all of its output areas classified in this group. There are 8 other wards that have 75% or more including Faverdale and Cramlington North in the North-East, Broughton Astley-Broughton and Redwell West in the East-Midlands, Kings Hill and Park Farm North in the South-East, Carrickstone and Westerwood in Scotland and Knocklynn in Northern Ireland.

Within this Supergroup: <a href="#">Prospering Younger Families</a> , <a href="#">Prospering Older Families</a> , <a href="#">Prospering Semis</a> , <a href="#">Thriving Suburbs</a>

Variables with proportions well above the national average	Manufacturing employment
	Lone parent household
	Terraced housing
	All flats

***Group 4c – Prospering Semis – 10.2% of the East Riding’s population***

The members of this group can be found across the UK with areas of concentration around the outskirts of London. There is one ward, Farnham Bourne in the South-East, that has 92% of its output areas classified in this group. There are 7 other wards that have 60% or more with Austenwood, Dorney and Burnham South, Farnham Bourne, Mount Hermon East St John's and Hook Heath in the South-East, Ballyholme and Bryansburn in Northern Ireland and Moordown in the South-West.

Variables with proportions well above the national average	None far above the national average*
Variables with proportions close to the national average	HE qualification
	Age 5-14
	Wholesale/retail trade employment
	Work from home
	Students (full time)
Variables with proportions far below the national average	People per room
	Terraced housing
	All flats
	Rent (public)

**Group 4d – Thriving Suburbs – 2.3% of the East Riding’s population**

The members of this subgroup can be found in areas of concentration in Scotland. There is one ward, Cramlington North in the North-East, that has 81% of its output areas classified in this subgroup. There are a further 7 wards that have 55% or more including Ballycrochan, Bluefield, Burleigh Hill and Movilla in Northern Ireland, Stewartfield and Carrickstone and Westerwood in Scotland and Broughton Astley-Astley in the East-Midlands.

Variables with proportions well above the national average	2+ car household
	Detached housing
Variables with proportions close to the national average	Public transport to work
	Economically inactive looking after family
	Health and social work employment
	Age 5-14
Variables with proportions far below the national average	No central heating
	Rent (public)
	Terraced housing

## Supergroup 5 – Constrained by Circumstances – 6.4% of the East Riding’s population

The members of this group can be found in areas of concentration around Scotland. There is one ward, Ward 9 in Scotland, that has 60% of it's output areas classified in this group. There are 4 other wards that have 40% or more including Fairmuir, Lochee East, Parkhall and Watsonville, all being within Scotland.

Within this Supergroup: <a href="#">Senior Communities</a> , <a href="#">Older Workers</a> , <a href="#">Public Housing</a>	
Variables with proportions well above the national average	Rent (Public)
	All flats
Variables with proportions close to the national average	Age 45-64
	No central heating
	Provide unpaid care
	Health and social work employment
	Wholesale/retail trade employment
Variables with proportions far below the national average	HE qualification
	Detached housing
	2+ car household

***Group 5a – Senior Communities – 1.0% of the East Riding’s population***

The members of this group can be found in areas of concentration within Scotland and the cities of the North-West. There is one ward, Craigy Hill in Northern Ireland, that has 83% of its output areas classified in this group. There are another 11 wards that have 60% or more including Ballyloran, Central, Killycrot, Route and Seymour Hill in Northern Ireland, Maxwellton, North Central and North Muirton in Scotland and Aberteifi/Cardigan - Rhyd-y-Fuwch, Pembroke Dock: Central and Tudur in Wales

Variables with proportions well above the national average	Single pensioner household
	Rent (Public)
	All flats
Variables with proportions close to the national average	Age 45-64
	Provide unpaid care
	Health and social work employment
Variables with proportions far below the national average	Age 5-14
	Age 0-4
	Rooms per household
	2+ car household
	Detached housing

***Group 5b – Older Workers – 5.1% of the East Riding’s population***

The members of this group can be found in areas of concentration around the cities of Glasgow in Scotland and Newcastle in the North-East. There is one ward, Keppochhill in Scotland, that has 87% of its output areas classified in this group. There are another 11 wards that have 70% or more including Barlanark, Bridgeton/Dalmarnock, Drumry, Easterhouse, Faifley, Glenwood, Parkhead, Queenslie, Summerhill and Udston in Scotland and New Lodge in Northern Ireland.

Variables with proportions well above the national average	Rent (Public)
	All flats
Variables with proportions close to the national average	Working part time
	No central heating
	Provide unpaid care
	Health and social work employment
	Age 0-4
	Age 5-14
Variables with proportions far below the national average	Age 45-64
	Detached housing

***Group 5c – Public Housing – 0.2% of the East Riding’s population***

The members of this subgroup can be found around the UK with concentrations in Scotland especially Glasgow. There is one ward, Ward 9 in Scotland, that has 51% of its Output Areas classified in this subgroup. A further 4 wards have 35% or more including Fairmuir, Lochee East , Parkhall and Watsonville, all being within Scotland.

Variables with proportions well above the national average	Unemployed
	Lone parent household
	All flats
	Rent (Public)
Variables with proportions close to the national average	Provide unpaid care
	Single pensioner household
	Manufacturing employment
	Health and social work employment
	Wholesale/retail trade employment
Variables with proportions far below the national average	Mining/quarrying/construction employment
	HE qualification
	2+ car household
	Detached housing

## Supergroup 6 – Typical Traits – 18.8% of the East Riding’s population

The members of this group can be found in areas of concentration around Sheffield and Manchester. There is one ward, Dodington in South-West, that has 82% of its output areas classified in this group. There are a further 11 wards that have 50% or more including Blandford Damory Down, Clevedon Yeo and Yate Central in the South-West, Lower Morden and Stonecot in London, Moulsham Lodge and Newnham in the East of England, St. Christopher's and Tonypany in Wales, Consett East in the North-East and Elson in the South-East.

Within this Supergroup: <a href="#">Settled Households</a> , <a href="#">Least Divergent</a> , <a href="#">Young Families in Terraced Homes</a> , <a href="#">Aspiring Households</a>	
Variables with proportions well above the national average	Terraced housing
Variables with proportions close to the national average	Single pensioner household

	All flats
	Rent (public)

***Group 6b – Least Divergent – 5.6% of the East Riding’s population***

The members of this group can be found in areas of concentration around the cities of the North-West. There is one ward, Central in Yorkshire and the Humber, that has 94% of its output areas classified in this group. There are another 10 wards that have 65% or more including Folkestone Foord, Fratton, Milton and Sheerness East in the South-East, Peel and Victoria in the North-West, Howard Town and St Andrew's in the East-Midlands, Ellacombe and St Thomas in the South-West.

Variables with proportions well above the national average	None far below the national average
Variables with proportions close to the national average	Age 5-14
	Population density
	Agriculture/fishing employment
	Households-non dependent children
	Provide unpaid care
	Rooms per household
	Manufacturing employment
Variables with proportions far below the national average	Routine/semi routine occupation
	None far above the national average

***Group 6c – Young Families in Terraced Homes – 5.7% of the East Riding’s population***

Although the members of this group can be found across the UK there is a higher concentration around the outskirts of London. There is one ward, Bicester South in the South-East, that has 73% of its output areas classified in this group. There are a further 6 wards that have 55% or more including Baldock East, Chafford and North Stifford and Leigh in the East of England, Castle and Rooksdown in the South-East and Bradley Stoke Bowsland in the South-West.

Variables with proportions well above the national average	Terraced housing
	Rent (private)
	No central heating
Variables with proportions close to the national average	Single pensioner household
	Public transport to work
	Lti (SIR)
	Indian/Pakistani or Bangladeshi
	Students (full time)
	Born outside the UK
	Age 5-14
Variables with proportions far below the national average	Detached housing
	Rent (public)

**Group 6d – Aspiring Households – 1.4% of the East Riding’s population**

The members of this subgroup can be found in areas of concentration in the North-West of England and Southern Wales. There is one ward, Consett East in the North-East, that has 60% of its output areas classified in this subgroup. There are 4 other wards that have 50% or more including Blandford Damory Down, Clevedon Yeo and Dodington in the South-West and St. Christopher's in Wales.

Variables with proportions well above the national average	None well above the national average
Variables with proportions close to the national average	Black African/black Caribbean or other black
	Age 45-64
	Health and social work employment
	Age 5-14
	Divorced
	Students
Variables with proportions far below the national average	Working part-time
	Rent (public)

## Supergroup 7 – Multicultural – 0.0% of the East Riding’s population

The members of this group can be found in areas of concentration within the major cities of England but fringe the centre of London. There are 3 wards, Daneshouse with Stoneyholme in the North-West, Lady Margaret in London and Baylis and Stoke in the South-East that have all of their output areas classified in this group.

Within this Supergroup: <a href="#">Asian Communities</a> , <a href="#">Afro-Caribbean Communities</a>	
Variables with proportions well above the national average	Rent (private and public)
	Public transport to work
	All flats
	Black African/black Caribbean or other black
	Indian/Pakistani or Bangladeshi
Variables with proportions close to the national average	Routine/semi routine occupation
	Work from home
	Health and social work employment
	Wholesale/retail trade employment
Variables with proportions far below the national average	Detached housing

**Group 7a – Asian Communities – 0.0% of the East Riding’s population**

The members of this group can be found in major cities of England with particular concentration within London. There are 6 wards, Harlesden, Hackney Downs, Brunswick Park, Camberwell Green, Livesey and Peckham all in London that have all of their output areas classified in this group. Within this group:

Variables with proportions well above the national average	Rent (private)
	Terraced housing
	No central heating
	Public transport to work
	Indian/Pakistani or Bangladeshi
	Black African/black Caribbean or other black
Variables with proportions close to the national average	Routine/semi routine occupation
	Work from home
	Health and social work employment
	Divorced
Variables with proportions far below the national average	Detached housing

**Group 7b – Afro-Caribbean Communities – 0.0% of the East Riding’s population**

The members of this subgroup can mainly be found in England, with concentrations around Birmingham. There is one ward, Daneshouse with Stoneyholme in the North-West, that has all its output areas classified in this subgroup. There are 8 other wards that have 80% or more including Bradford Moor and University in Yorkshire and the Humber, Belgrave and Latimer in the East-Midlands, Foleshill and Small Heath in the West-Midlands, Whitefield in the North-West and Dallow in the East of England.

Variables with proportions well above the national average	Rent (private and public)
	Public transport to work
	No central heating
	Born outside the UK
	Indian/Pakistani or Bangladeshi
	Black African/black Caribbean or other black
	Unemployed
Variables with proportions close to the national average	Routine/semi routine occupation
