

## Safety Camera Locations

Humberside Safety Camera Partnership is undertaking speed enforcement at 87 core sites across the region. All these sites have a history of casualties and collisions and fully comply with the guidelines and rules laid down by Government.

### Site conspicuity and visibility

The enforcement vehicle (van or motorcycle), the operator or equipment can be clearly seen by the traffic. Each site is clearly signed with the “Box Brownie” camera sign or blue “Police speed check area” sign.

Please note that the rules and guidelines governing the conspicuity of the sites have nothing whatsoever to do with a speeding offence and are only related to the financial arrangements of the scheme.

### Speed limits

All sites are signed in accordance with Government rules and regulations. Please be aware that different classifications of vehicles will have to adhere to different speed limits. **It is the driver’s responsibility to know what restrictions apply to their vehicle.**

For further information on speed limits visit [www.highwaycode.gov.uk](http://www.highwaycode.gov.uk)

### National speed limits

The national speed limit sign is a round white sign with a black diagonal across it. At the current time signs can only be placed at the start of a national speed limit zone. Repeater signs are not required along unlit sections of national speed limit roads.

The national speed limit on **single carriageway** sections is a maximum of 60mph for cars and motorcycles, less for other type of vehicles.

The national speed limit on **dual carriageway** sections is a maximum of 70mph for cars and motorcycles, less for other type of vehicles.

### Location of Fixed Cameras

Humberside Safety Camera Partnership has fixed cameras at the following locations. The cameras are clearly visible to the traffic.

<b>Hull</b>	<b>Camera Type</b>	<b>Posted Speed Limit</b>
A1079 Beverley Road (near Mizzen Rd)	Fixed	40
Clough Road	Fixed	30
Spring Bank West	Fixed	30

### **East Riding – enforcement routes**

Humberside Safety Camera Partnership enforces the speed limit along two routes of the A1079 using fixed and mobile cameras.

A1079 Beverley bypass – the partnership is using fixed cameras and mobile units to enforce the speed limit from Killingswoldgraves roundabout to Dunswell roundabout. The partnership is enforcing the national speed limit in the single and dual carriageway sections.

A1079 Market Weighton bypass and Arras Hill – the partnership is using fixed cameras and mobile units to enforce the speed limit along the Market Weighton bypass and Arras Hill. The partnership is enforcing the national speed limit and both these sections of road are classified as single carriageway.

The fixed cameras and mobile units are clearly visible to the traffic.

### Location of Red Light Cameras

Humberside Safety Camera Partnership does not currently operate any red light cameras within the region but will consider their use in the future.

### Location of Mobile Sites

Humberside Safety Camera Partnership uses clearly marked mobile equipment mounted on the side of the road and enforcement vehicles (vans and motorcycles), which are been parked, in locations that have been safety audited and are clearly visible to drivers. The mobile units can enforce at any point along the length of a designate safety camera site.

<b>East Riding</b>	<b>Camera Type</b>	<b>Posted Speed Limit</b>
Barmby Moor - A1079	Mobile	50
