

The Health Psychology Exchange have kindly developed a number of additional resources that we wanted to share with you following the webinar that took place on the 11 June 2020.

<https://www.yhphnetwork.co.uk/links-and-resources/behavioural-science-hub-yh/the-psychological-support-needs-of-the-care-home-workforce-during-covid-19/>

New content added to the web page above include:

- A brief guide provides a structure and general approach to enable you to have productive and supportive conversations with care home managers about psychological support for their staff.
- Guidance for Professionals on the six agenda items for discussing psychological support of health and social care staff based on British Psychological Society guidance. Safety/Perceived Safety, Physical Wellbeing. De-compression, Psychological First Aid, Decision Making and Leadership & Comms. Each guide is broken down into:
 - What is this?
 - Why should I be paying attention to this?
 - What should my first steps be?

How do I find out more?
